

Sage software

Licence information

A single user licence permits one installation of the program, on a single machine. If you want to keep a backup of the program and data, you would need to purchase an additional installation licence. To use Sage software over a network you will need additional user licences.

Technical information

System requirements

Hardware	Note: Performance is improved with higher specification PCs and networks. A Netbook PC, running an entry level operating system, will require less advanced hardware.
Processor	2Ghz processor or higher
Memory (RAM)	1Gb RAM – Windows XP 2Gb RAM – Windows 8, 7, Vista, Server 2003, Server 2008, Small Business Server 2011 4Gb RAM – For all PCs running a 64-bit operating system
Hard Disk Space	10Gb of free disk space
Network	1Gbps network (100 Mbps minimum)
Operating System ¹	All 32 or 64-bit variants of the following operating systems: <ul style="list-style-type: none">• Windows 8• Windows 7• Windows Vista• Windows XP• Windows Server 2003 *• Windows Server 2008 *• Windows Small Business Server 2011 * Note: Please ensure all the latest Microsoft Service Packs and Updates are installed. * Running software like Microsoft Exchange or Microsoft SQL Server on a Small Business Server will reduce the performance of Sage 50 Accounts
Office Integration	Office 2003 Office 2007 Office 2010 32-bit edition
Internet Connectivity ²	A broadband Internet connection with a minimum download speed of 2Mbps is essential to keep your copy of Sage 50 Accounts up to date, and to take full advantage of its features.
Display	Screen Resolution of 1024 x 768
Anti-Virus	To optimise performance your Anti-Virus software should be configured to exclude Sage files from its checking routines.

¹ Please ensure the latest service packs are installed for your operating system before installing or upgrading Sage products. If you require any further information please contact your Sage support representative.

² Required for use of mobile client reporting features.

Sage software

Technical notes

- Performance will be improved with higher specification computers and networks, and it is only possible to install one copy on a single computer.
- Works with Microsoft XP Service Pack 3 and all later editions, and please ensure you have the latest Microsoft updates installed.
- This product will not install or run on the Microsoft Windows 95, Windows 98, Windows ME, Windows 2000 or Windows NT4 operating systems.
- The latest service packs should be installed for your operating system before installing or upgrading Sage products. 32-bit Operating Systems recommended.
- Whilst there are no browser requirements for Sage software, we recommend Microsoft Internet Explorer 6 or above for internet access to Sage Support and important Sage updates for your products.
- Some features in Sage software require an internet connection. If you require any further information please contact your Sage Support representative.

Apple Mac compatibility

Sage software is not compatible with Apple Macs, unless you are running Windows XP, Windows Vista or Windows 7 via [Apple's Boot Camp utility](#).
